

Safer world.

WHO WE ARE

For more than 25 years, Pacific Disaster Center (PDC) has supported the most demanding government customers and nonprofits worldwide, sharing a common mission to **save lives** and **reduce disaster risk**. As an applied research center managed by the University of Hawai'i, we are continuously researching and innovating the most advanced technologies and developing sound practices to support effective disaster mitigation, preparation, response, and recovery.

WHAT WE DO

We work side-by-side with government agencies, nongovernmental and humanitarian organizations to conduct national baseline assessments, develop risk reduction strategies, support training and exercises, and to operationalize our DisasterAWARE® technology. DisasterAWARE offers unrivaled global risk intelligence including early warning, anticipated impact modeling, advanced analytics, and the largest collection of scientifically-vetted data for decision making.

WHY WE DO IT

Pacific Disaster Center was established in 1996 following devastation from Hurricane Iniki to the Hawaiian Islands. The Center provides consolidated information from the most reliable sources and the best science and technology for disaster risk reduction at home and beyond. PDC is now a global actor, helping to develop disaster management capacity and support effective decisions, policies, and actions for a safer, more resilient world.

“

The benchmark assessment, which PDC conducted in close partnership with a broad community of stakeholders in the international, national, local and NGO communities over the course of the past two years, has effected measurable change within the Ministry of the Interior and SINAPROC [Panama's civil defense system].

”

— Adherbal de la Rosa, Panamá's director of the Technical Office of Comprehensive Disaster Risk Management

Unrivaled Technology

25,000+

DisasterAWARE Pro Users

Augmented hazard data through PDC's artificial intelligence AI for Humanity™

of Disasters

“

For nearly two decades, ASEAN and PDC have worked together to advance early warning and disaster risk reduction science throughout Southeast Asia. PDC is a vital partner who has helped ensure the best science and technology are appropriately and effectively utilized to prepare for and respond to disasters throughout the region.
